GE Ohmeda TuffSat Oximeter

For clinicians on the go

Clinical intelligence in the palm of your hand.

As a busy clinician, you need mobile tools that can withstand the toughest clinical situations. The GE Ohmeda TuffSat* handheld oximeter offers the portability and resiliency you demand. This durable GE Ohmeda TuffSat oximeter goes with you from patient to patient, enabling you to quickly access the relevant clinical intelligence you need to help you make appropriate care decisions.

The GE Ohmeda TuffSat oximeter is highly versatile, making it well suited for spot-checks across many different patient types and clinical situations. It easily fits in your pocket or can be worn on your belt. Plus, it offers excellent visibility in low-light conditions, and automatically shuts off to extend the battery life. So it's ready to go when you are.

Home Care

EMS Transport

Intuitive and easy to use.

The GE Ohmeda TuffSat oximeter is user friendly and simple to use. Several bright color choices make it easily distinguishable and allow for different hospital departments to be assigned their own unique color.

- Small and lightweight for simple, one-hand operation.
- Rubber grip offers secure handling.
- Intuitive features require minimal training.
- Backlit with large LCD displays and easy-to-read numbers for excellent visibility.
- Low battery indicator.

Clinical excellence and rugged reliability.

The GE Ohmeda TuffSat oximeter has been rigorously stress-tested to meet international durability standards and to be effective in challenging conditions.

For performance accuracy, the GE Ohmeda TuffSat oximeter includes PI_r (relative perfusion index measurement), which enables easy identification of signal quality. With this quantitative value, you can compare the strength of the pulse signal at different sites on a patient and locate the best site for the sensor. In addition, the pleth bar complements the PI_r value by providing pulse rate strength information for improved patient assessment.

Flexible connections for any situation.

When the GE Ohmeda TuffSat oximeter is used in conjunction with TruSignal sensors and cables, it creates a complete oximeter solution for use in many clinical settings. TruSignal sensors offer solutions for infant, pediatric and adult applications. Multi-site sensors can be applied to hands, feet, fingers and toes. Reusable sensors are built with enhanced durability. Adhesive sensors are excellent for high motion and infection control.

Ordering information.

Please use the following product codes when ordering.

Yellow Ohmeda TuffSat handheld oximeter	6051-0000-159
Yellow Ohmeda TuffSat with TruSignal Integrated Finger sensor	6051-0000-160
Blue Ohmeda TuffSat with TruSignal Integrated Finger sensor	6051-0000-185
Pink Ohmeda TuffSat with TruSignal Integrated Finger sensor	6051-0000-186
White Ohmeda TuffSat with TruSignal Integrated Finger sensor	6051-0000-187
Deluxe carrying case	6050-0005-653
TruSignal Integrated Ear sensor	TS-E4-H
TruSignal Integrated Finger sensor	TS-F1-H (1 m/3.3ft) TS-F4-H (4 m/13 ft)
TruSignal Integrated Wrap sensor	TS-W4-H

The following sensors require the TruSignal Interconnect cable (TS-H3):

Reusable sensors:

TruSignal Finger sensor	TS-F-D
TruSignal Wrap sensor	TS-W-D
TruSignal Sensitive Skin sensor	TS-SE-3
TruSignal FingerTip sensor	TS-SA-D
TruSignal PediTip sensor	TS-SP-D

Disposable sensors:

TruSignal AllFit sensor	TS-AF-10 (10/box)	TS-AF-25 (25/box)
TruSignal Adult/Pediatric sensor	TS-AP-10 (10/box)	TS-AP-25 (25/box)
